

Help our school get its fair share.

Answering the 2010 Census is an easy way you can help the community. Census data affect the amount of federal funding Montana receives for programs that impact our lives. Grants for programs like:

School Title I Funding
Special Education
Rural Education Achievement
Improving Teacher Quality

In 2008 ALONE, these grants brought over **80 MILLION** dollars to Montana for our educational system.

Other programs, like the State Children's Insurance Program (CHIP) and even the number of flu shots allocated to the community, are affected by population counts. A census questionnaire will be delivered to your home in March. Make sure every member of your household is included on your form. Everyone counts!

Your Homework:

Answer the census and mail it in by
Census Day - April 1, 2010

**"Montana Is Counting On You
and so is your child!"**

-Denise Juneau, Montana Superintendent of Public Instruction
